

Zebra & Quagga Mussel Veliger Detection Services

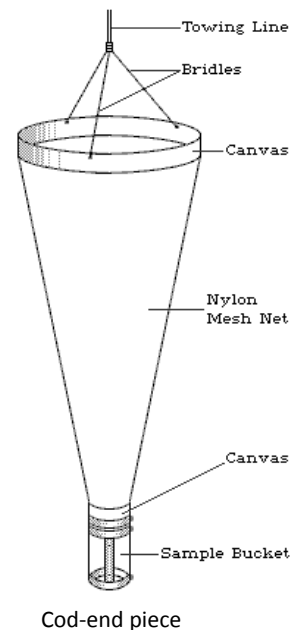

VELIGER SAMPLE COLLECTION KIT

“WHAT'S IN YOUR WATER?™”

Clean Lakes, Inc.'s (CLI) Invasive Zebra & Quagga Mussel Veliger Sample Collection Kit includes the following:

- Sampling Protocols for Lakes, Ponds, and flowing water systems (irrigation and conveyance canals)
- Plankton Net: 20 cm diameter x 64 micron mesh plankton net with deployment rope & ballast weight
- Four (4) sample containers (250 mL) pre-filled with preservative (95% ethanol). Additional sample containers will be provided at no charge (4 is the maximum that can be shipped at one time due to ethanol shipping restrictions).
- Pre-Labeled Sample Shipping Box's with supplies, directions
- Five (5) gallon bucket for decontamination of equipment (plankton net)
- Squirt bottle (250 mL) for decontamination of equipment

It is estimated at this time that the Results Report will be issued electronically or by fax no later than three (3) business days after the sample arrives at the Clean Lakes, Inc. Boise Idaho office.
