

## Clean Lakes, Inc. Teams with Aquamarine for the Distribution of Mechanical Aquatic Vegetation Control Equipment in the Western United States

With over 25 years experience in the design and operation of mechanical equipment for the control of aquatic vegetation, Clean Lakes, Inc. and Aquamarine are teaming up to support programs that include a mechanical aquatic vegetation removal component in the Western United States. Clean Lakes, Inc. staff and Aquamarine staff have been working together since the late 1980's, when we delivered an Aquatic Weed Harvester to the University of Florida, Center for Aquatic Plants for use in the evaluation of aquatic vegetation control methods.
